

# Making Milk

*is Easy!*

## 10 Steps to Make Plenty of Milk

### 1 Frequent feeds, not formula.

The more often you feed, the more milk you make. If you give formula, your baby will feel too full to nurse frequently.

### 2 All you need is breastmilk!

The American Academy of Pediatrics recommends that your baby have a diet of purely breastmilk for the first 6 months – no other food or drink is needed.

### 3 Feed early and often.

Feed at the earliest signs of hunger: if baby's awake, sucking on hands, moving his mouth or eyes, or stretching.

### 4 If he didn't swallow, he didn't eat.

Listening for the sound of swallowing will help you know if your baby's getting enough.

### 5 Say 'No' to pacifiers and bottles.

If pacifiers and bottles are used when your baby is hungry, you may not be nursing often enough to make plenty of milk.

### 6 Sleep near your baby and nurse lying down.

You can rest while you feed your baby!

### 7 Have baby's mouth open wide like a shout, with lips flipped out.

The tip of your nipple should be in the back of his throat. He should be directly facing you, chest-to-chest, chin-to-breast. Proper positioning prevents sore nipples.

### 8 Watch the baby, not the clock.

Feed your baby when she's hungry, and switch sides when swallowing slows down or she takes herself off the breast.

### 9 Go everywhere!

Plan to take your newborn everywhere with you for the first several weeks.

### 10 Don't wait to ask for help, if you need it.

If you wait too long to get the help you need, it may be harder to breastfeed. Stick with it – it's worth it!
