Please visit Njradon.org for more information regarding radon.

This notice is provided to you by an organization or individual certified by the NJDEP to perform radon gas or radon progeny testing measurements. NJSAS 26:30-74 requires that no certified person disclose to anyone except the DEP or the department of health the address or owners of a nonpublic building that the person has tested or treated for the presence of radon gas or radon progeny, unless the owner of the building waives in writing this right of confidentiality. In the event of sale or lease of a building that has been tested, the seller shall provide the buyer at the time the contract of sale is entered into, with a copy of the results of the test and evidence of any subsequent mitigation or treatment. Any prospective buyer who contracts for the testing shall have the right to require the results of that testing. Any questions, comments or complaints regarding the persons performing these measurements, or related mitigation, or safeguarding services, should be directed to the NJDEP, Att: Radon Section, Bureau of Environmental Radiation, at 1-800-648-0394.

LIMITATION OF LIABILITY: While we at Certified Environmental Radon Services, and all of our licensed professional technicians, make every effort to maintain quality control including duplicate canister tests, blanks and "spiked" detectors, we make no warranty of any kind, either expressed or implied, for the consequences of false test results. Before any remediation action is taken, it is important that follow-up tests be conducted in accordance with USEPA protocols and NJDEP regulations. It is well known that the radon concentration fluctuates greatly under changing weather conditions. Furthermore, radon test cannot be CERTIFIED, since there is no chain of custody of the test kit, and the "closed house" conditions cannot be monitored continuously.

This notice is provided to you by an organization or individual certified by the NJDEP to perform radon gas or radon progeny testing measurements. N.J.A.C. 8:29-13 requires that no certified person disclose to anyone except the DEP or the department of health the address or owners of a nonpublic building that the person has tested or treated for the presence of radon gas or radon progeny, unless the owner of the building waives in writing the right of confidentiality. In the case of prospective sale of a building that has been tested for radon gas or progeny, the seller shall provide the buyer at the time the contract of sale is entered into, with a copy of the results of that test and evidence of any subsequent mitigation or treatment. Any prospective buyer who contracts for the testing shall have the right to receive the results of that testing. Any questions, comments or complaints regarding the persons performing those measurements, or related mitigation, or safeguards services, should be directed to the NJDEP, Att: Radon Section, Bureau of Environmental Radiation, at 1-800-468-0994.

LIMITATION OF LIABILITY: While we at Certified Environmental Radon Services, and all of our licensed professional technicians, make every effort to maintain quality control including duplicate canister tests, blanks and "spiked" detectors, we cannot ensure 100% reliability in our testing. For the consequences of false test results, before any remediation action is taken, it is important that follow-up tests be conducted in accordance with USEPA protocols and NJDEP regulations. It is well known that the radon concentration fluctuates greatly under changing weather conditions. Furthermore, radon tests cannot be CERTIFIED, since there is no chain of custody of the test kit, and the "closed-system" conditions cannot be maintained continuously.

This notice is provided to you by an organization or individual certified by the NJDEP to perform radon gas or radon progeny testing measurements. N.J.A.C. 8:25-73 requires that no certified person disclose to anyone except the DEP or the department of health the address or owners of a nonpublic building that the person has tested or treated for the presence of radon gas or radon progeny, unless the owner of the building waives in writing the right of confidentiality. In the case of prospective sale of a building that has been tested for radon gas or progeny, the seller shall provide the buyer at the time the contract of sale is entered into, with a copy of the results of that test and evidence of any subsequent obligation or treatment. Any prospective buyer who contracts for the testing shall have the right to receive the results of that testing. Any questions, comments or complaints regarding the persons performing these measurements, or related mitigation, or remediation services, should be directed to the NJDEP, 4th Floor, Radon Section, Bureau of Environmental Radiation, at 1-800-649-0299.

LIMITATION OF LIABILITY: While we at Certified Environmental Radon Services, and all of our licensed professional technicians, make every effort to maintain quality control including duplicate canister tests, blanks and "spikes" detection, we make no warranty of any kind, either expressed or implied, for the consequences of false test results. Before any remediation action is taken, it is important that follow-up tests be conducted in accordance with USEPA protocols and NJDEP regulations. It is well known that the radon concentration fluctuates greatly under changing weather conditions. Furthermore, radon tests cannot be "CERTIFIED," since there is no chain of custody of the test kit, and the "closed-box" conditions cannot be maintained continuously.

MES13784

This notice is provided to you by an organization or individual certified by the NJDEP to perform radon gas or radon property testing measurements. N.J.A.C. 8:26-22-71 requires that no certified person discloses to anyone except the NDEP or the department of health the addresses or owners of a nonpublic building that the person has tested or treated for the presence of radon gas or radon property, unless the owner of the building waives his right of confidentiality. In the case of prospective sale of a building that has been tested for radon gas or property, the seller shall provide the buyer at the time the contract of sale is entered into, with a copy of the results of that test and evidence of any subsequent mitigation or treatment. Any prospective buyer who contracts for the testing shall have the right to receive the results of that testing. Any questions, comments or complaints regarding the persons performing these measurements, or related mitigation, or safeguarding services, should be directed to the NDEP, Attn: Radon Section, Bureau of Environmental Radiation, at 1-800-648-0291.

LIMITATION OF LIABILITY: While at Certified Environmental Radon Services, and all of our licensed professional technicians, make every effort to maintain quality control including duplicate canister tests, blank and "sulfed" detectors, we make no warranty of any kind, either expressed or implied, for the correctness of these test results. Before any remedial action is taken, it is important that follow-up tests be conducted in accordance with USPHS protocols and NJDEP regulations. It is well known that the radon concentration fluctuate greatly under changing weather conditions. Furthermore, radon tests cannot be CERTIFIED, since there is no chain of custody of the test kit, and the "closed-house" conditions cannot be monitored continuously.

MES13784

This notice is provided to you by an organization or individual certified by the NJDEP to perform radon gas or radon progeny testing services. NJSA 26:2D-73 requires that no certified person disclose to anyone except the DEP or the department of health the address or owners of a residential building that the person has tested or tested for the presence of radon gas or radon progeny, unless the owner of the building waives in writing the right of confidentiality. In the case of prospective sale of a building that has been tested for radon gas or progeny, the seller shall provide the buyer at the time the contract of sale is executed, a copy of the results of that test and evidence of any subsequent mitigation or treatment. Any prospective buyer who contracts for the testing shall have the right to receive the results of that testing. Any questions, concerns or complaints regarding the person performing these measurements, or related mitigation, or safeguards services, should be directed to the NJDEP, After Radon Section, Bureau of Environmental Radiation, at 1-800-646-0394.

LIMITATION OF LIABILITY: While we at Certified Environmental Radon Services, and all of our licensed professional technicians, make every effort to maintain quality control including duplicate canister tests, blanks and "spilled" detectors, we make no warranty of any kind, either expressed or implied, for the correctness of test results. Before any remediation action is taken, it is important that follow-up tests be conducted in accordance with USEPA protocols and NJDEP regulations. It is well known that the radon concentration fluctuates greatly under changing weather conditions. Furthermore, radon tests cannot be CERTIFIED, since there is no chain of custody of the test kit, and the "closed-house" conditions cannot be monitored continuously.
